ORDERING

Using the DODAAC is critical for delivery of supplies at the RIGHT PLACE...

The Department of Defense Address Activity Code (DODAAC) is a six position code that uniquely identifies a unit, activity or organization that has the authority to requisition and/or receive materiel.

ORDERING

Three addresses can be used for each DODAAC:

- **TAC1 - Identifies the mailing address for the activity. (mandatory)**
- **TAC2 - Identifies the 'ship to' (freight) address for the activity.**
- **TAC3 - Identifies the billing address. (The activity responsible for payment of bills.)**

If no TAC2 is present, warfighter.net will ship to TAC1.

ORDERING

HOW TO PLACE AN ORDER

- **MILSTRIP (Military Standard Requisitioning Procedures)**
 - Requisitioning through the supply system and not the contracting office.
- **Credit Card (IMPAC)**
 - DOD E-Mail website does not need a DODAAC to order: Capable of shipping to an in-the-clear address (local) or deployed address
 - Warfighter website needs a DODAAC to place an order: Capable of shipping to an in-the-clear address (local) or deployed address

ORDERING

Advice Codes

When ordering supplies through Warfighter or DoD Email, always select Advice Code:

2L

Quantity exceeds normal demands

WHY?: *There are many advice codes to choose from, however the only one that affects Ecclesiastical Supplies is 2L. This is because some items have a maximum quantity per the vendor contract.*
